

EzSKY150 Installation Manual

. Preface

EzSKY150 offers the user to use a regular telephone for making both Skype Internet and regular local phone calls. With one telephone set integrated with Skype Internet telephone and traditional telephone, the user can switch between Internet telephone and traditional telephone at will. EzSKY150 comes with a standard USB connection port and does not require any additional power source. It can be used in Windows 2000 and Windows XP. As long as EzSKY150 is connected to the computer and the Internet, the user can make a telephone call immediately.

Regardless if you are an Enterprise user, a SOHO user, a traveler, or a family user, EzSKY150 can make Skype lovers to talk in a more relaxed and convenient manner.

Use EzSKY150 to make telephone calls

- **Use EzSKY150 to dial Skype numbers**

While using “EzSKY150 Telephone Adapter”, no window will appear. (The default setting is “PSTN Priority Mode”.) When the telephone set is picked up and “**” is pressed to switch to “Skype Mode”, the computer system will show Skype main control window.

- **Under “PSTN Priority” Mode**

Pick up the telephone transmitter, and press “**” to switch to “Skype” Mode

- **To make Skype Calls**: To dial a Skype Speed Dial number, enter the number and then press “#” to connect. The Speed Dial number will show on the bottom of Skype window.

Communication starts after the connection is complete.

- **Under “Skype Priority Mode”**

Pick up the telephone transmitter and follow the steps mentioned above to make a Skype Call.

- **Use EzSKY150 to make a regular telephone call**

- **To make a regular telephone call under “PSTN Priority Mode”**:

Following the regular procedure to make a regular telephone call.

- **To make a regular telephone call under “Skype Priority Mode”**:

Pick up the telephone transmitter, and press “**” to switch to “PSTN Mode” and then follow the regular procedure to make a regular telephone call.

- Use EzSKY150 to make a Conference Call

Follow the Conference Call procedure for Skype to make a conference call.

Step 1

Step 2

Step 3

- Receiving incoming calls from “Skype” and “a regular telephone”

After EzSky150 is connected to a regular telephone set, when there are calls from “Skype” or “regular telephones”, the communication will start as long as the telephone transmitter is picked up (as the regular procedure to answer the telephone).

- Use EzSKY150 to answer regular call waiting

While using SzSKY150 to make a “Skype” call, if there is a regular call waiting coming, “a calling waiting notice sound” will be heard from the transmitter. You either press “**” to hold the skype call and talk to the call waiting or just ignore the call waiting..

- Use EzSKY150 to call “Skype Out”

1. Buy the calling credits on line

- Start “Skype“ operation window
- Click on “Function” →”Connect to my Skype account”
- Enter your credit card numbers to buy the credits.

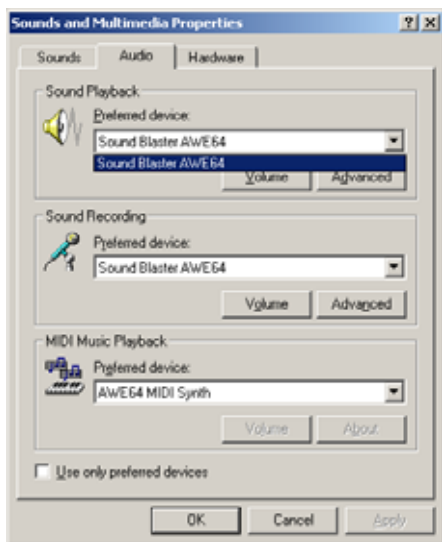

2. Dialing Method:

- Dial “ 00+ country code+ area code+ telephone number+#”
- Dialing Examples:
 - i. Dial a local number in Taiwan: 00886225652323#
 - ii. Dial a cell telephone number in Taiwan: 00886925xxxxxx#
- Press “#” to complete dialing the call.

※Note:

1. The sound card cannot play music while EzSKY150 is running.

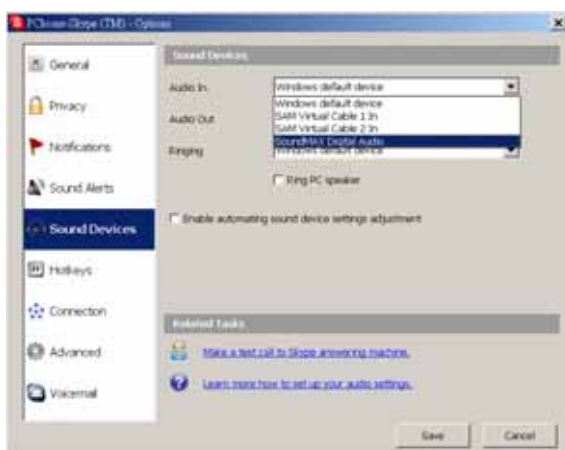

- Click on “Start” →”Setup”→”Control”→”Sound and Media”→”Sound” and then choose the content of “Sound and Media”.

- Set “devices” for “sound play “ and “sound record” as the sound card of the computer. After setting is completed, the computer sound card can play music.

2. No sound when making a telephone call

- Start “Skype” Operation Window.
- Click on “Function”→”Setup Option”→”Sound Device” to start the setup window.

- Set “sound input” and “sound output” as “USB Sound Device” and press “Yes”, then it can work properly.
